TITLE : WRIST BAND CONTINUOUS BODY

ABSTRACT : PROBLEM TO BE SOLVED: To provide a wrist band continuous body forming a wrist band convenient in management of combined use and with pleasant feeling.

SOLUTION: The wrist band continuous body is so constituted that at least two continuous sections of wrist bands 20A, 20B are separably formed in the width direction on a strip shaped band main body 20, and the band main body 20 is continuously formed in the longitudinal direction to provide the wrist band continuous body. Thus, a pair of wrist bands do not go apart, which can prevent mix-up. By making the skin touching side of the wrist band 20A, 20B of cloth and by processing the separating part 2A, 2B and band hole 3A, 3B, etc., from the back side toward the surface side, the pleasant feeling and prolonged use is enabled.
